

ENVIRONMENTAL INFORMATION & ASPECTS

- ✓ Maintenance of 2 **wells** for the **irrigation** of the surrounding area.
- ✓ **Planting** of the **gardens** with a wide variety of trees, fruit-citrus and floriculture according to the **flora** of the island.
- ✓ Use of **LED** lamps with high energy efficiency.
- ✓ **Training of our staff** on environmental protection and environmental consciousness.
- ✓ Use of **solar water heaters** to produce **hot water** for all room needs.
- ✓ Use of **magnetic cards** on the doors and **magnetic traps** on doors and windows for unnecessary use of Air Conditioners.
- ✓ **Enlighten** the visitors about our environmental actions.

Visitors could at least show during their stay the awareness of saving the natural resources of the island and especially water consumption, due to prolonged drought in recent years on the island of Paros.

They visitors could turn off the electrical appliances if they are not in use (TVs, Air Conditioners, Laptops, etc.), to close the washbasin faucet during the tooth washing or even to not leave unnecessarily the taps open.

In addition, visitors can choose on a one-day prior notice, not to change linen and / or towels.

Enjoy your stay!
